

Install and Setup Instructions for iPhone App

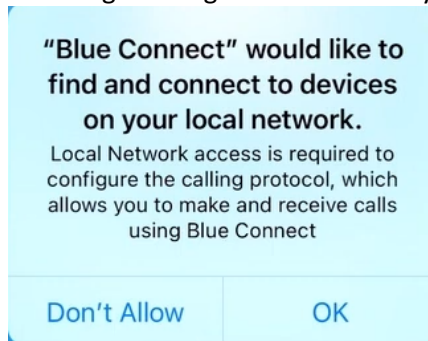

1. Open the App Store
2. Search “Univerge Blue Connect”.
3. Find the app with the multicoloured diamond logo.
4. Press the icon that looks like a cloud with a down arrow.

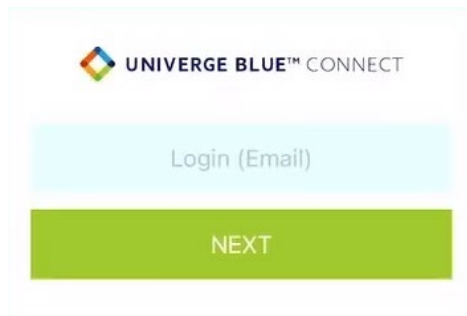

5. Press “Open”.

6. Agree to permission requests and go through the slides until you get to the login screen.

7. Enter your email.

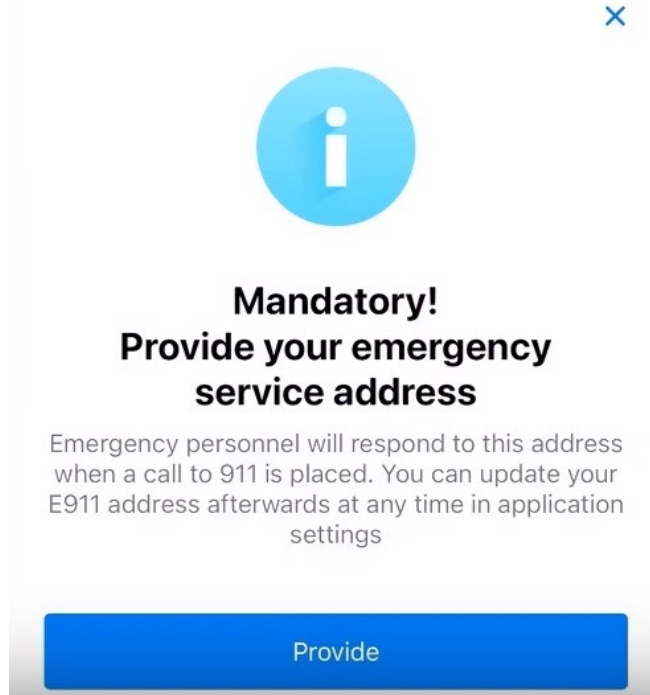

Install and Setup Instructions for iPhone App

8. Enter your password. If you do not know your password, contact us and we'll give you a new one.

The image shows a login screen for 'UNIVERGE BLUE® CONNECT'. At the top is the logo, a colorful square with a white 'i' inside. Below the logo is the text 'UNIVERGE BLUE® CONNECT'. Underneath that is the instruction 'Please sign in to access this service'. There are two input fields: the first is for a username, which is currently obscured by a black bar; the second is for a password, with the placeholder text 'Password'. To the right of the password field is a blue link that says 'Forgot password?'. At the bottom of the form is a large blue button with the text 'Sign in' in white.

9. Ensure you enter your emergency service address in the case you need to dial 911.

The image shows a mandatory notification screen. At the top right is a blue 'X' icon. In the center is a large blue circle containing a white lowercase 'i'. Below the circle is the text 'Mandatory!' in bold, followed by 'Provide your emergency service address' in bold. Underneath that is a paragraph of text: 'Emergency personnel will respond to this address when a call to 911 is placed. You can update your E911 address afterwards at any time in application settings'. At the bottom is a large blue button with the text 'Provide' in white.

You're now in the app. If you have further questions, please contact us at support@proteltech.ca
